Dave, Mark,

Please find the attached contract for the recreational facilities in Collingwood. We have made the changes you asked for pertaining to the holdover and compensation section (b). Paul has had preliminary discussions with Ed regarding the first draw and it will be substantial enough to cover both the compensation and your initial operation costs. For this reason, 5(b) was left as it was.

Everything is moving forward as planned in Collingwood. As expected there have been some efforts on behalf of the co-chair of the Town's Parks, Recreation and Culture committee who has attempted to spark up a lobbying group to convince Council to go ahead with the 35 million dollar option in Central Park. He has demonstrated this type of approach before. There is a process in place for committees to report to Council. It appears that when Council does not follow his recommendations he goes to the media in an attempt to organize support in the community against Council.

We are managing the situation in a straightforward manner and it is expected that the said gentleman will be asked to step down from his position on Monday.

Enjoy the rest of the weekend and we look forward to receiving the quotes for the two facilities on Monday.

Regards,  
Abby
