Paul

I believe we are all still on the same path with both projects. If Tom is steering waves let me know I will address this direct with him. We don't need this project being questioned we need it to go forward making the decision very simple and clean. Let me know what the issue is and again I will have the conversation with Tom.

Thanks

Importance: High

Good afternoon:

We need to organize a call to once again discuss our collective strategy. Ed was very confused regarding part of the discussion with Tom this morning. If there has been a change in approach I think we all need to understand it and then determine how we participate going forward.

Regards,
Paul
