Subject: Pat Mills: Request to meet Re: Collingwood Central Park Project

Ed: Congratulations on your recent appointment! I dropped by on Friday but left as I understand you are very busy.

I would appreciate taking fifteen minutes of your time when you can see daylight. I am a Rep for a 125 year old Canadian building company called Sprung Buildings. Their hockey arenas are endorsed by Hockey Canada and their pool enclosures are state of the art.

<http://www.sprungarenas.com/tech-specs-twin>

Sprung has built 12,000 buildings in 95 countries and has a history of spectacular projects and satisfied customers. I understand that the Collingwood Central Park Project is in its infancy however I believe it will help you to know how Sprung will be able to help your team achieve your vision.

I walked the Collingwood YMCA site and took photographs of the Curling Arena and YMCA. Sprung will be able to build you a wonderful double pad ice arena and a swimming complex that will tie the Curling Building and YMCA together to create a very exciting athletic complex for Collingwood. The result will be a spectacular design, substantial cost savings and a positive collaborative building experience. We can tie the buildings together ensuring seamless pedestrian flow from complex to complex. We can match colors and add logos.

Please review the attached double arena website above and let me know your thoughts.

Sprung has the experience and ability to create LEED certified buildings that are at or above code on everything. You can lease to own and the value added will be substantial cost savings + world famous engineering designs.

Please let me know when we might be able to meet.

Until then,
Best regards
Pat Mills
