Hi Paul,

In view of our prior conversations regarding the possibility of a flat roof structure as opposed to a fabric dome structure on the sports facility, I have set up a meeting with one of my colleagues at Sprung Structures on Tuesday at 10:00.

The meeting is on site at PRA to discuss the structural integrity required for housing solar panels and running off the grid. I would like to come into future meetings with as much of the ground work completed as possible.

I know we both have many contacts in renewable energy so I will get the specs and we can review them for discussion purposes. I have already determined that they meet all of the LEED requirements.

Regards,
Abby
